

Office of the State Superintendent of Education

RETURN TO CHILD CARE CRITERIA

Note: These scenarios include the standard criteria to return to child care for children and staff. Individual guidance from DC Health or a healthcare provider should always supersede these criteria. See page 4 of this document for special considerations for fully vaccinated individuals and for individuals who have recovered for COVID-19 in the last 90 days.

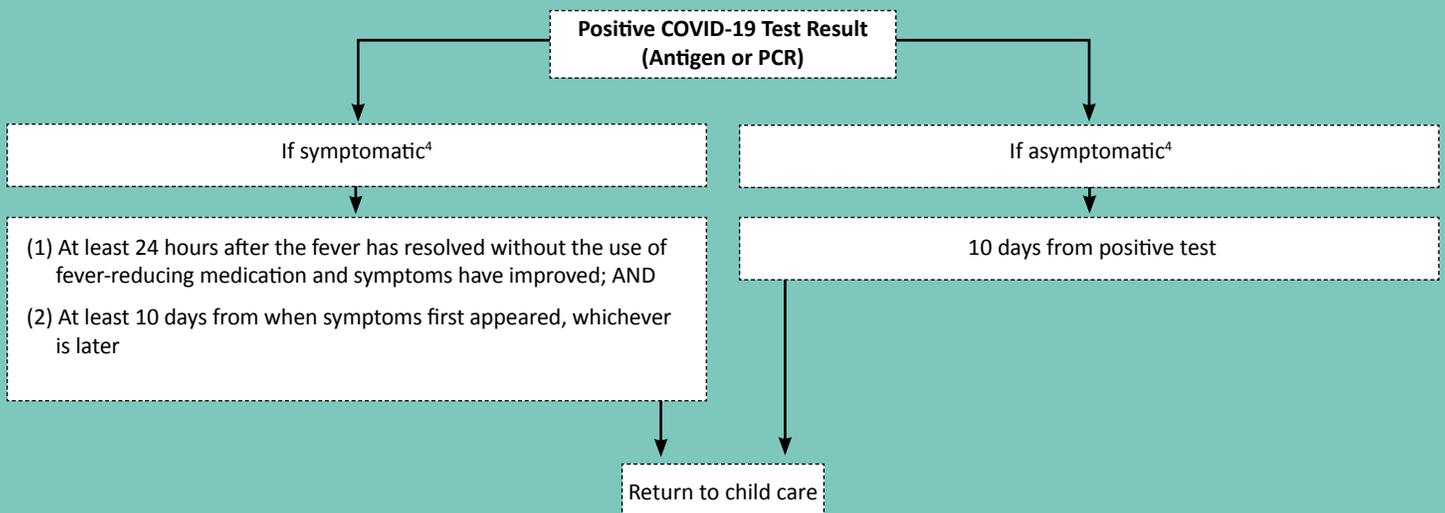

Scenario 1: Child or Staff Member with COVID-19 Symptoms¹

Note: This scenario requires exclusion until return criteria are met.

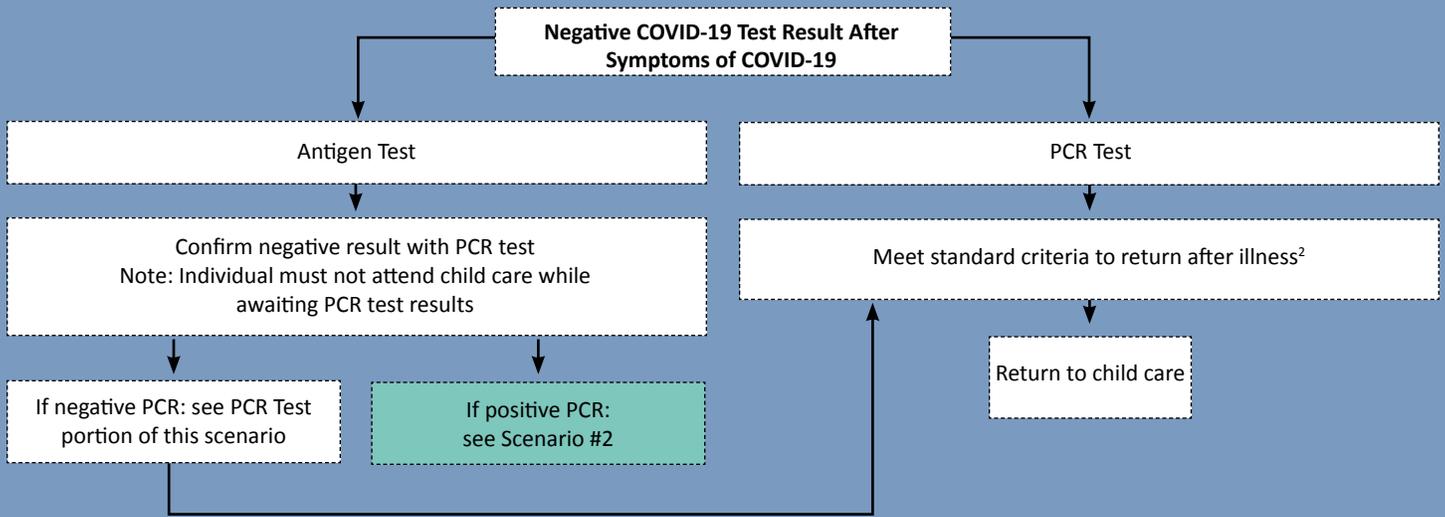

Scenario 2: Child or Staff Member with a Positive COVID-19 Test Result³

Note: This scenario requires exclusion until return criteria are met.

Scenario 3: Child or Staff Member with a Negative COVID-19 Test Result After Symptoms of COVID-19

Note: This scenario requires exclusion until return criteria are met.

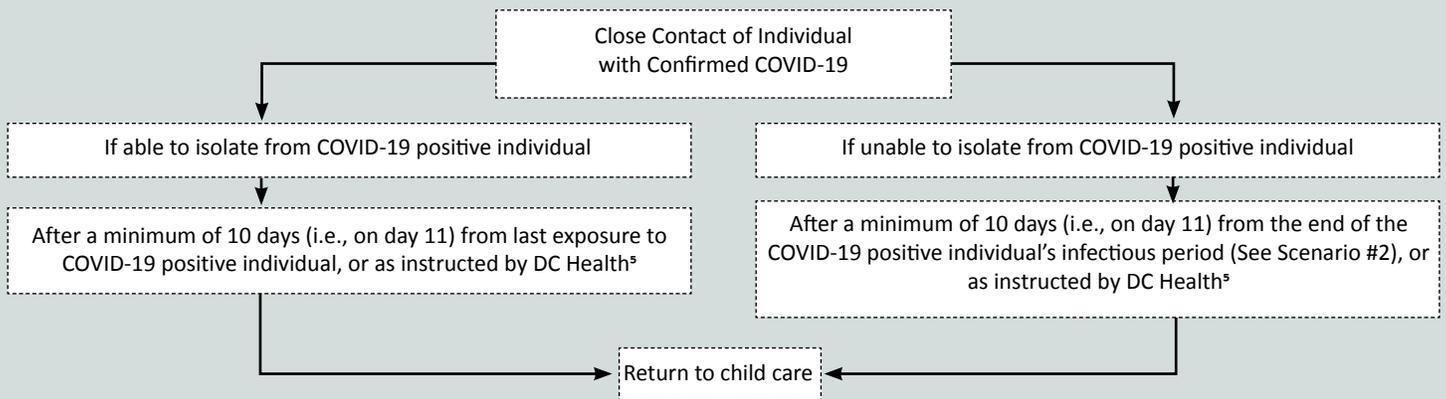

Scenario 4: Child or Staff Member with Documentation from Healthcare Provider of Alternate Diagnosis After Symptoms of COVID-19

Scenario 5: Child or Staff Member is a Close Contact of an Individual with Confirmed COVID-19⁶

Note: This scenario requires exclusion until return criteria are met.

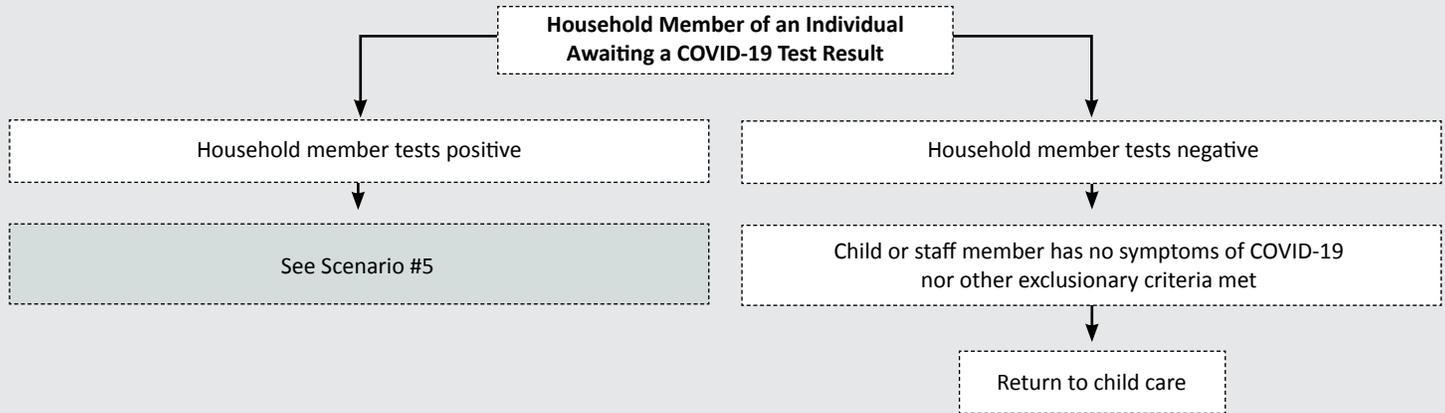

Note: See page 4 of this document for special considerations for fully vaccinated individuals and for individuals who have recovered for COVID-19 in the last 90 days.

Scenario 6: Child or Staff Member is a Household Member of a Symptomatic Individual Awaiting a COVID-19 Test Result

Note: This scenario recommends exclusion until return criteria are met.

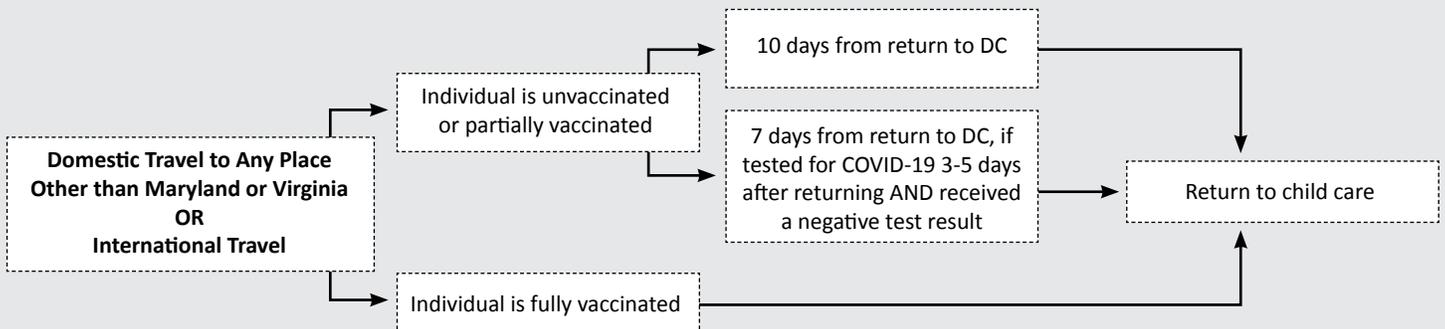

Note: See page 4 of this document for special considerations for fully vaccinated individuals and for individuals who have recovered for COVID-19 in the last 90 days.

Scenario 7: Child or Staff Member Traveled Domestically or Internationally⁷

Note: This scenario recommends exclusion until return criteria are met.

Note: See page 4 of this document for special considerations for fully vaccinated individuals and for individuals who have recovered for COVID-19 in the last 90 days.

Endnotes

- Children or staff with pre-existing health conditions that present with specific COVID-19–like symptoms must not be excluded from entering the building on the basis of those specific symptoms, if a healthcare provider has provided written or verbal documentation that those specific symptoms are not due to COVID-19.
- Standard criteria to return after illness refers to the individual facility’s existing policies and protocols for a child or employee to return to care after illness.
- See DC Health’s Guidance for Persons Who Tested Positive for COVID-19 on coronavirus.dc.gov/healthguidance for more information.
- Regardless of whether symptomatic or asymptomatic, close contacts (including all members of the household) must not attend child care until they meet the criteria to return per Scenario #5.
- Per Scenario #5, a negative test result after close contact with an individual with confirmed COVID-19 must not shorten the time period of at least 10 days before returning to child care.
- DC Health strongly recommends that individuals who live or work with someone at higher-risk for COVID-19 quarantine for 14 days. See DC Health’s Guidance for Quarantine after COVID-19 Exposure on coronavirus.dc.gov/healthguidance for more information.
- For more detailed guidance related to returning from domestic and international travel, see DC Health’s Guidance for travel at coronavirus.dc.gov/healthguidance.

Special Considerations

Individuals who have Recently Recovered from COVID-19

Provided that they do not currently have any symptoms consistent with COVID-19, an individual who has **tested positive for COVID-19 within the last 90 days** may return to care immediately in the following circumstances:

1. After close contact with someone with confirmed COVID-19,
2. When a symptomatic household member is awaiting COVID-19 test results, or
3. After travel.

Any individual with symptoms consistent with COVID-19 must follow Scenario #1.

Individuals who are Fully Vaccinated Against COVID-19

Provided that they do not currently have any symptoms consistent with COVID-19, an individual who is **fully vaccinated** against COVID-19 may return to care immediately in the following circumstances:

1. After close contact with someone with confirmed COVID-19,
2. When a symptomatic household member is awaiting COVID-19 test results, or
3. After travel.

A person is considered fully vaccinated 14 days after completion of a COVID-19 vaccination series (after the second dose of a 2-dose series, or after one dose of a single-dose vaccine).

Any individual with symptoms consistent with COVID-19 must follow Scenario #1.
